

ONE BOX DOESN'T FIT ALL!

**SOLVE THE EETS PUZZLE WITH THE HELP
OF SHELL EXPERTS**

Running your fleet across different European countries can be a complex task. When it comes to tolling you have a variety of different national regulations, providers, offers and technologies. In 2004 the EC adopted the European Electronic Tolling Service (EETS) – a Directive to streamline systems and to achieve interoperability.

But: EETS is not a box!

It is a service and there is not one single way to achieve it. As there is currently no universal toll box that covers all EU member countries.

Shell's EETS-Service – we have all the pieces of the puzzle to offer the custom-tailored tolling solution for your fleet

More than 30 years of experience in the European tolling space make Shell the strong and professional partner you need.

We don't provide one tolling solution for all but understand your businesses demands and help you find the electronic payment solution that works best for your fleet.

OUR EXPERIENCE - YOUR BENEFITS

Easy planning and administration

Consolidate all your road service needs through one supplier. Benefit from our large network of toll providers and use your Shell Card to pay for every toll service you need.

Save time and money

Rely on a custom-tailored tolling solution that keeps your fleet processes efficient and sustainable. One set of invoices keeps your processes clear and helps you to reduce costs.

Stay in control

Maintain an overview over the fast-developing European tolling space and let Shell be your reliable partner that gives you professional advice and peace of mind.

Feel secure

Always be protected from fraud and unauthorized access to your data with Shell Card's most modern safety measures like e.g. Chip & PIN technology.
